DETAILED ACTION

Allowable Subject Matter

1. Claims 43, 45, and 46 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claim 43. U.S. Patent No. 5,502,412 to Choi et al., U.S. Patent Application Publication No. 2002/0175883 to Onozawa et al., and PCT Publication No. WO 02/095914 to Stanley all teach similar systems to that of the present application. However, with respect to independent claim 43, Choi and Onozawa fail to teach or suggest a pre-drive circuit comprising first, second, third, and fourth drive systems, each having an input amplifier circuit amplifying an input voltage, input to an input voltage terminal, a high level shift circuit shifting a level of a signal output from the input amplifier circuit and an output amplifier circuit amplifying a shift signal output from the high level shift circuit, wherein each drive system has a common constitution and the plurality of drive systems are provided within an IC formed on a common semiconductor chip. Furthermore, with respect to independent claim 43, Stanley fails to teach or suggest at least one of the X electrode drive circuit and the Y electrode drive circuit comprising: a third switch supplying a high level voltage to the plurality of X electrodes or the plurality of Y electrodes via a first coil, and a fourth switch supplying a low level voltage to the plurality of X electrodes or the plurality of Y electrodes via a second coil.

Therefore, independent claim 43, as well as all respective dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
